Иск. № 010/23.01.2018 г.

To: Municipality of Madzharovo

Attn: Ivan Semerdzhiev, Director of Directorate "Settlement of territory, European projects and municipal development"

Re: "Supply of equipment for waste management for the needs of the Municipality of Madzharovo within project CB005.1.12.008"- REF.: CB005.1.12.008-LP-Supply 1

### QUESTIONS:

Dear Mr. Semerdzhiev,

Concerning the above mentioned Open Tender, please clarify the following questions:

1. In ANNEX II + III: TECHNICAL SPECIFICATIONS + TECHNICAL OFFER; Item No.1- Waste collection truck – 1. Basic motor vehicle, you require four-cylinder diesel engine with horse power: 250-380 HP. We would like to inform you that all trucks with such engine power have 5 or 6 – cylinder engines. If you require 4-cylinder engine, you should decrease the required power. Based on this information, please clarify the number of the cylinders and the power of the engine of the waste collection truck.
2. In ANNEX II.+ III: TECHNICAL SPECIFICATIONS + TECHNICAL OFFER; Item No.1- Waste collection truck and Item No.2 – Street cleaner truck, you require environmental category of the engine for both trucks – EURO 3. We would like to inform you that any new truck, without EURO 6 environmental standard cannot be registered in Bulgaria. Based on this information, please clarify the required environmental standard for both trucks.

Thank you in advance for your prompt reply to our questions.
