

Answer of the question №1 under Local open procedure with subject “Supply of equipment for waste management for the needs of the Municipality of Madzharovo within project CB005.1.12.008”

The question consider two points.

Answers of the contracting authority:

1. In ANNEX II + TECHNICAL SPECIFICATIONS + TECHNICAL OFFER, Item №1 – Waste collection truck – 1. Basic motor vehicle, we require four-cylinder diesel engine with horse power 250-380 HP.

If you offer Waste collection truck with 5 or 6 cylinder engine it will meet the requirement of the contracting authority. Consider that the Waste collection truck must have a minimum of four cylinder diesel engine.

2. In ANNEX II + TECHNICAL SPECIFICATIONS + TECHNICAL OFFER, Item №1 – Waste collection truck and Item №2-Street cleaner truck we require environmental category of the engine for both trucks – EURO 3. This category EURO 3 is written in the approved project specifications and is the minimum requirement. If machines with category EURO 6 are offered it will meet the requirements of the contracting authority.

Mayor of Madzharovo Municipality,

Milko Armutliev
